Report Book 41/10

G.S. 319

D.M. 572/55

TO THE CHIEF GEOLOGIST:

Reported Iron Ore, Middleback Range, Hd. Ash.

- T. P. McInerny -

Herewith completed report on five (5) iron ore prospects investigated by C.J.R. Kingsbury, Assistant Geologist.

No body warranting testing was disclosed during the investigation and in view of previous work in the area it is unlikely that such a body exists.

Mr. T. P. McInerny is apparently unable to assist in the field, and it is therefore recommended that work be discontinued until detailed mapping of the taconites in the area is to be done when a further inspection could be arranged.

(sgd.) (Graham Whitten)
SENIOR GEOLOGIST.
